POLAND PRODUCES SURVEYING INSTRUMENTS

THEODOLITES NOW BEING MADE -- Rzeczpospolita, No 234, 26 Aug 49

After the war, Poland suffered not only from a shortage of specialists but also from a shortage of surveying equipment, which had to be imported.

The Chief National Surveying Office has negotiated with the Optical Instrument Factory for the manufacture of seven radial theodolites. One theodolite, a modern device, will save 2,500,000 zlotys on photogrammetric field surveys.

The Zeiss factory in Jena manufactured theodolites before the war. At present, Poland is almost the only country making these instruments. For the manufacture of smaller surveying equipment, optical instrument machine shops were set up in association with the Photogrammetric Bureau.

JULY ALCOHOL PRODUCTION LISTED -- Zycis HANSTAWY, No 228, 20 Aug 19

During July, the State Alcohol Monopoly produced 462,000 liters of alcohol for industrial purposes. Because of the wide-spread temperance program, whiskey production was only 87 percent of plan.

NEW RESEARCH CENTER OPENED -- Trybuna Ludu, No 218, 10 Aug 49

A new biochemical research laboratory has been opened in Rydzgoszcz by the regional administration of PGR (State Farms). The new establishment will conduct research and analysis, manufacture chemicals and render professional advice.
